

VANDERWESTEN RUTHERFORD MANTECON
CONSULTING STRUCTURAL, MECHANICAL & ELECTRICAL ENGINEERS
LONDON • HAMILTON • WINDSOR • OTTAWA

March 12, 2009

To Whom It May Concern:

Vanderwesten Rutherford Mantecon Inc. has had the pleasure of working with Group 92 Mechanical Inc. on several occasions and on projects of varying size and complexity. Whether it was the restrictive and demanding work environment of the *McMaster University Medical Centre*, the difficulty of performing a boiler upgrade on an operational campus such as the Welland Campus of *Niagara College of Canada*, or, most recently, a complete Mechanical renovation (including Process Venting) under a very tight 5-month schedule at *Universal Resource Recovery Welland Recycling and Compost Facility* (a 120,000 square foot indoor composting facility), Group 92 has met each challenge, exceeded expectations, and proven to be professional and highly capable.

I am confident in recommending Group 92 Mechanical Inc. for your upcoming project, and look forward to a continued working relationship with them, well into the future.

Yours truly,

VANDERWESTEN RUTHERFORD MANTECON
CONSULTING ENGINEERS
